PACOM VIGIL CORE provides access control solutions, alarm, video, building management and security monitoring.

Our solutions for network cabinets, power generators and cell towers include latest technology for remote access control, alarms, theft prevention, energy management, video and security monitoring, as well as customized solutions.

S1000 Smart Controller

Feel secure anywhere, anytime with the S1000 Intelligent Control Panel. Manage Access Control, Alarms and Store Management functions remotely and securely from one panel. The compact, low-power, multi-function S1000 security control panel is located at each location.

VIGIL CORE

VIGIL CORE is an intelligent, centrally controlled management platform, designed primarily for monitoring data such as access control, alarms, etc. from one to thousands of sites for any organization.
