

Visitor Management System

The PACOM Visitor Management System is a software solution within PACOM VIGIL CORE designed for quick and accurate identification of visitors in facilities with a high frequency of guests or a high level of safety requirements.

The Visitor Management System communicates with the ID Camera input data to automatically complete visitor data fields and captures live photographs using a desktop camera.

HIGHLIGHTS

- Intuitive graphical interface
- Quick and accurate visitor registration
- Manage visit details
- ID Scanner is capable of scanning ID cards, driver's licenses, passports, etc
- ID Scanner supports more than 2000 forms of ID documents worldwide

BENEFITS

- Streamline visitor management
- Increase data accuracy
- Improve business quality through personalized services
- Increase security levels
